Hi, I'm Matt Webley, founder of the Secret Wealth Project.

(20+ years in internet marketing)

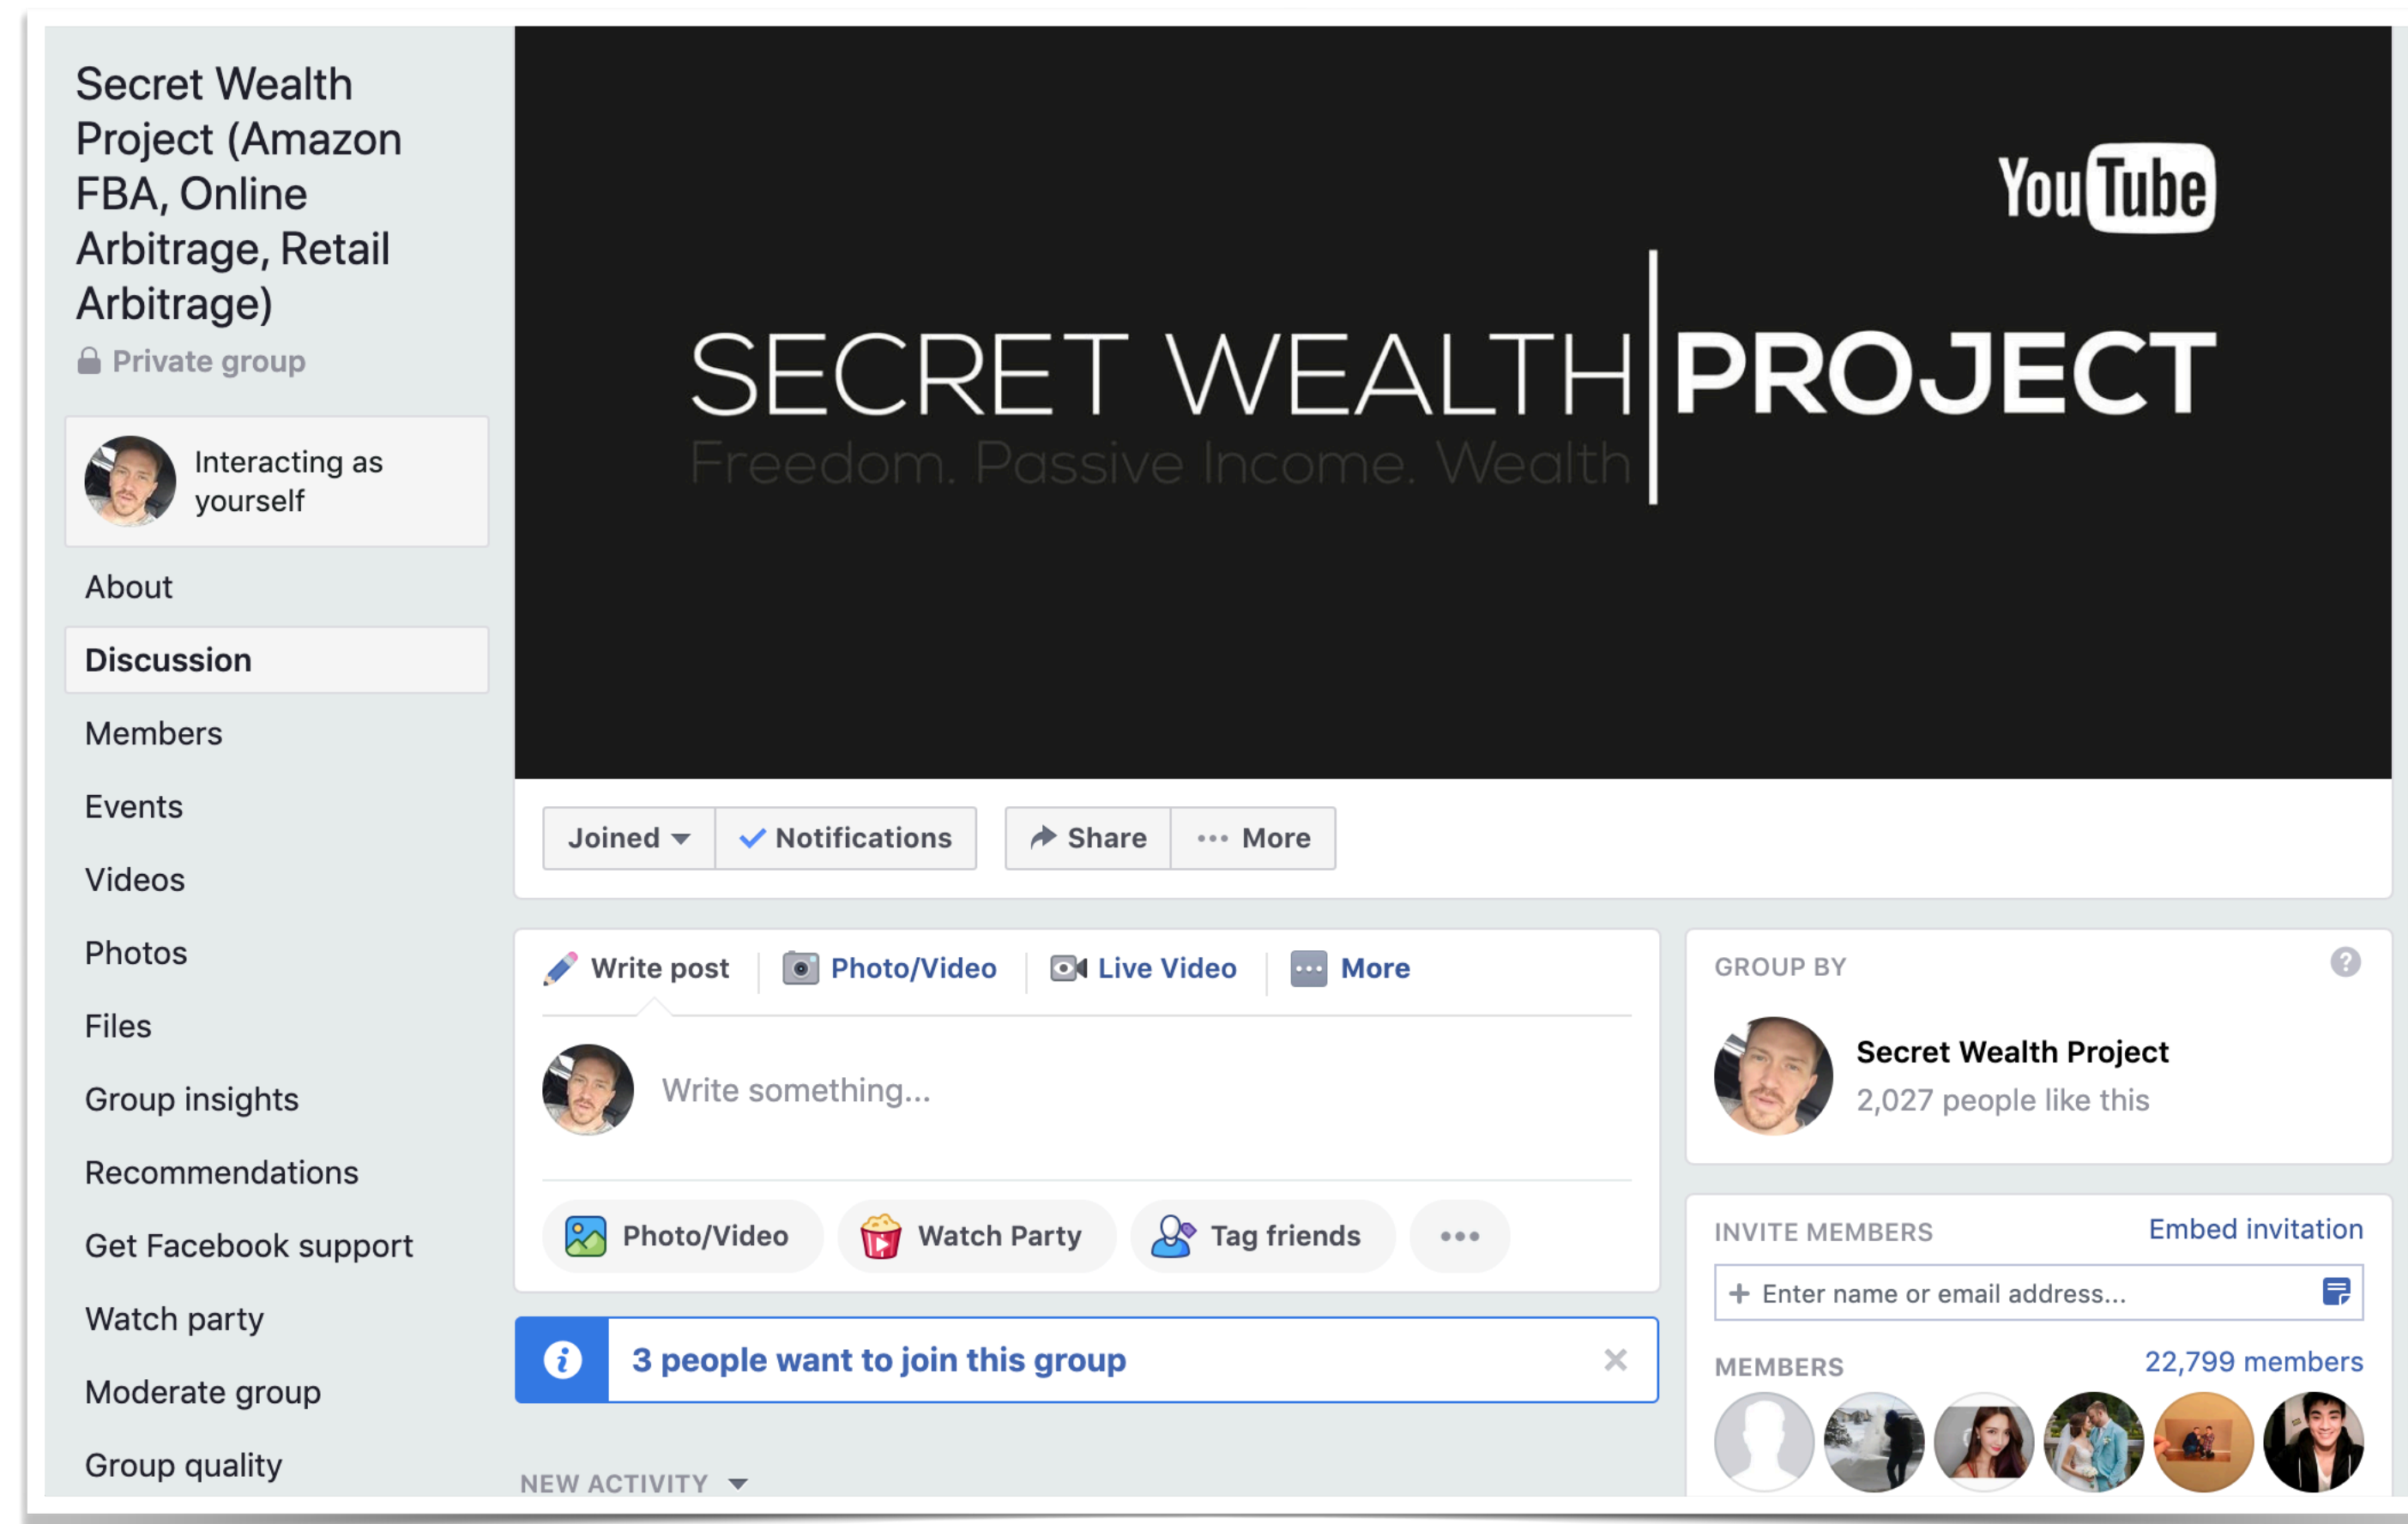

...And this is Natalie Cromie

(Content Director of SWP and Online Arbitrage expert!)

We've helped over 27,000+ people make money on Amazon via our FREE Facebook Group - the Secret Wealth Project!

**And Nat hosts a 100% FREE Amazon seller
show...**

**(LIVE streaming every Tuesday at 7pm UK time in Secret Wealth Project
Facebook group and on YouTube)**

See not everybody knows but
ANYBODY can sell on Amazon -
including you!

You don't need any business experience...

You don't need wholesale contacts...

And you don't need staff, premises
or lot's of money!

You can get started from home today, by buying stock in very small quantities from online stores and then sending it into **Amazon**, for them to sell to their customers.

I'm going to show you EXACTLY
how to do that today!

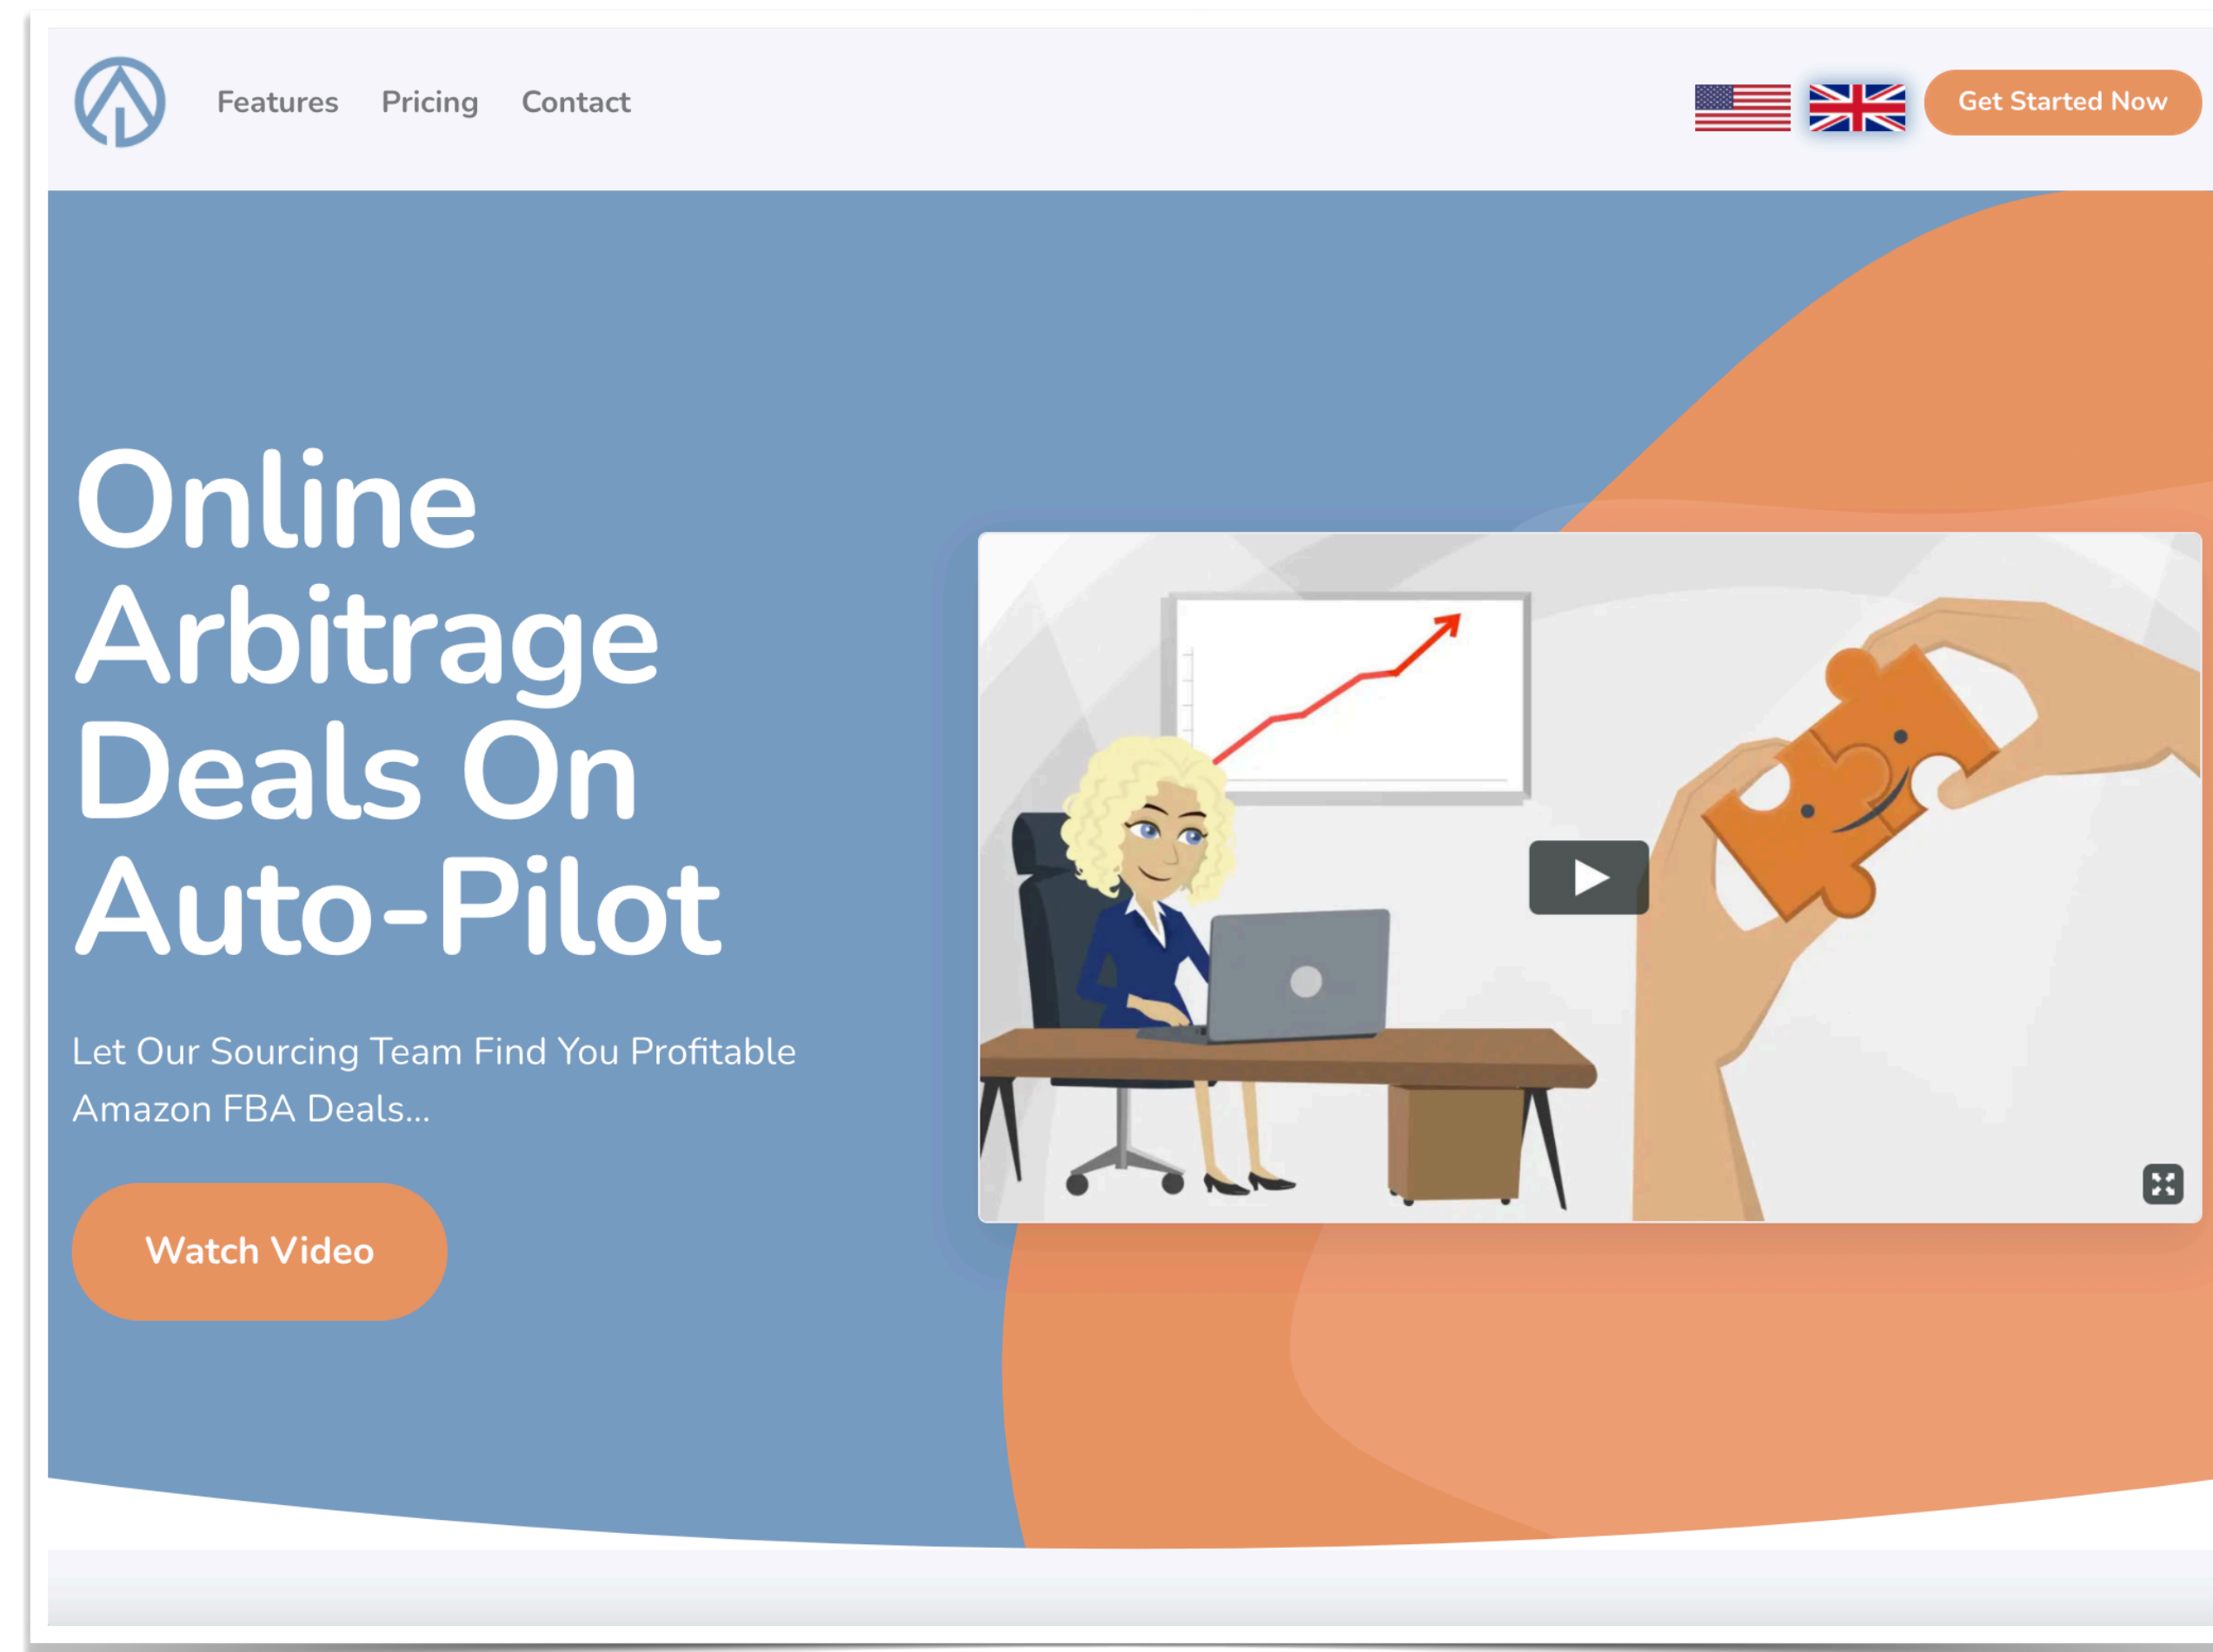

Finding products cheaper in online stores during sales and clearance offers and then selling them on Amazon is called **Online Arbitrage**.

Amazon is NOT always the cheapest.

Finding products that are cheaper OFF of Amazon is NOT easy - which is why we use a website called OnlineArbitrageDeals.com

OnlineArbitrageDeals.com has a team of people that scour the internet searching for profitable deals in the UK & US using manual methods and special software.

They have already checked the deal to make sure it meets certain criteria, but you should **NEVER** just buy every deal it shows you.

You have to do what is called 'due diligence'

This is where you make sure the deal you are buying has enough profit for you after Amazon take their fees for selling and shipping it to their customer for you.

You also have to make sure it is selling
fast enough too!

There's more things you need to check before you buy any stock and it can take a while to do that and it's easy to make mistakes, so we use a piece of software called BuyBotPro.

BuyBotPro analyzes the deal for you using thousands of data points and tells you whether it's a good deal or not so you can feel much safer in your purchase.

BREAKING: BuyBotPro Desktop Now Includes New Mobile App For iPhone & Android!

BUYBOTPRO® Features Pricing Contact

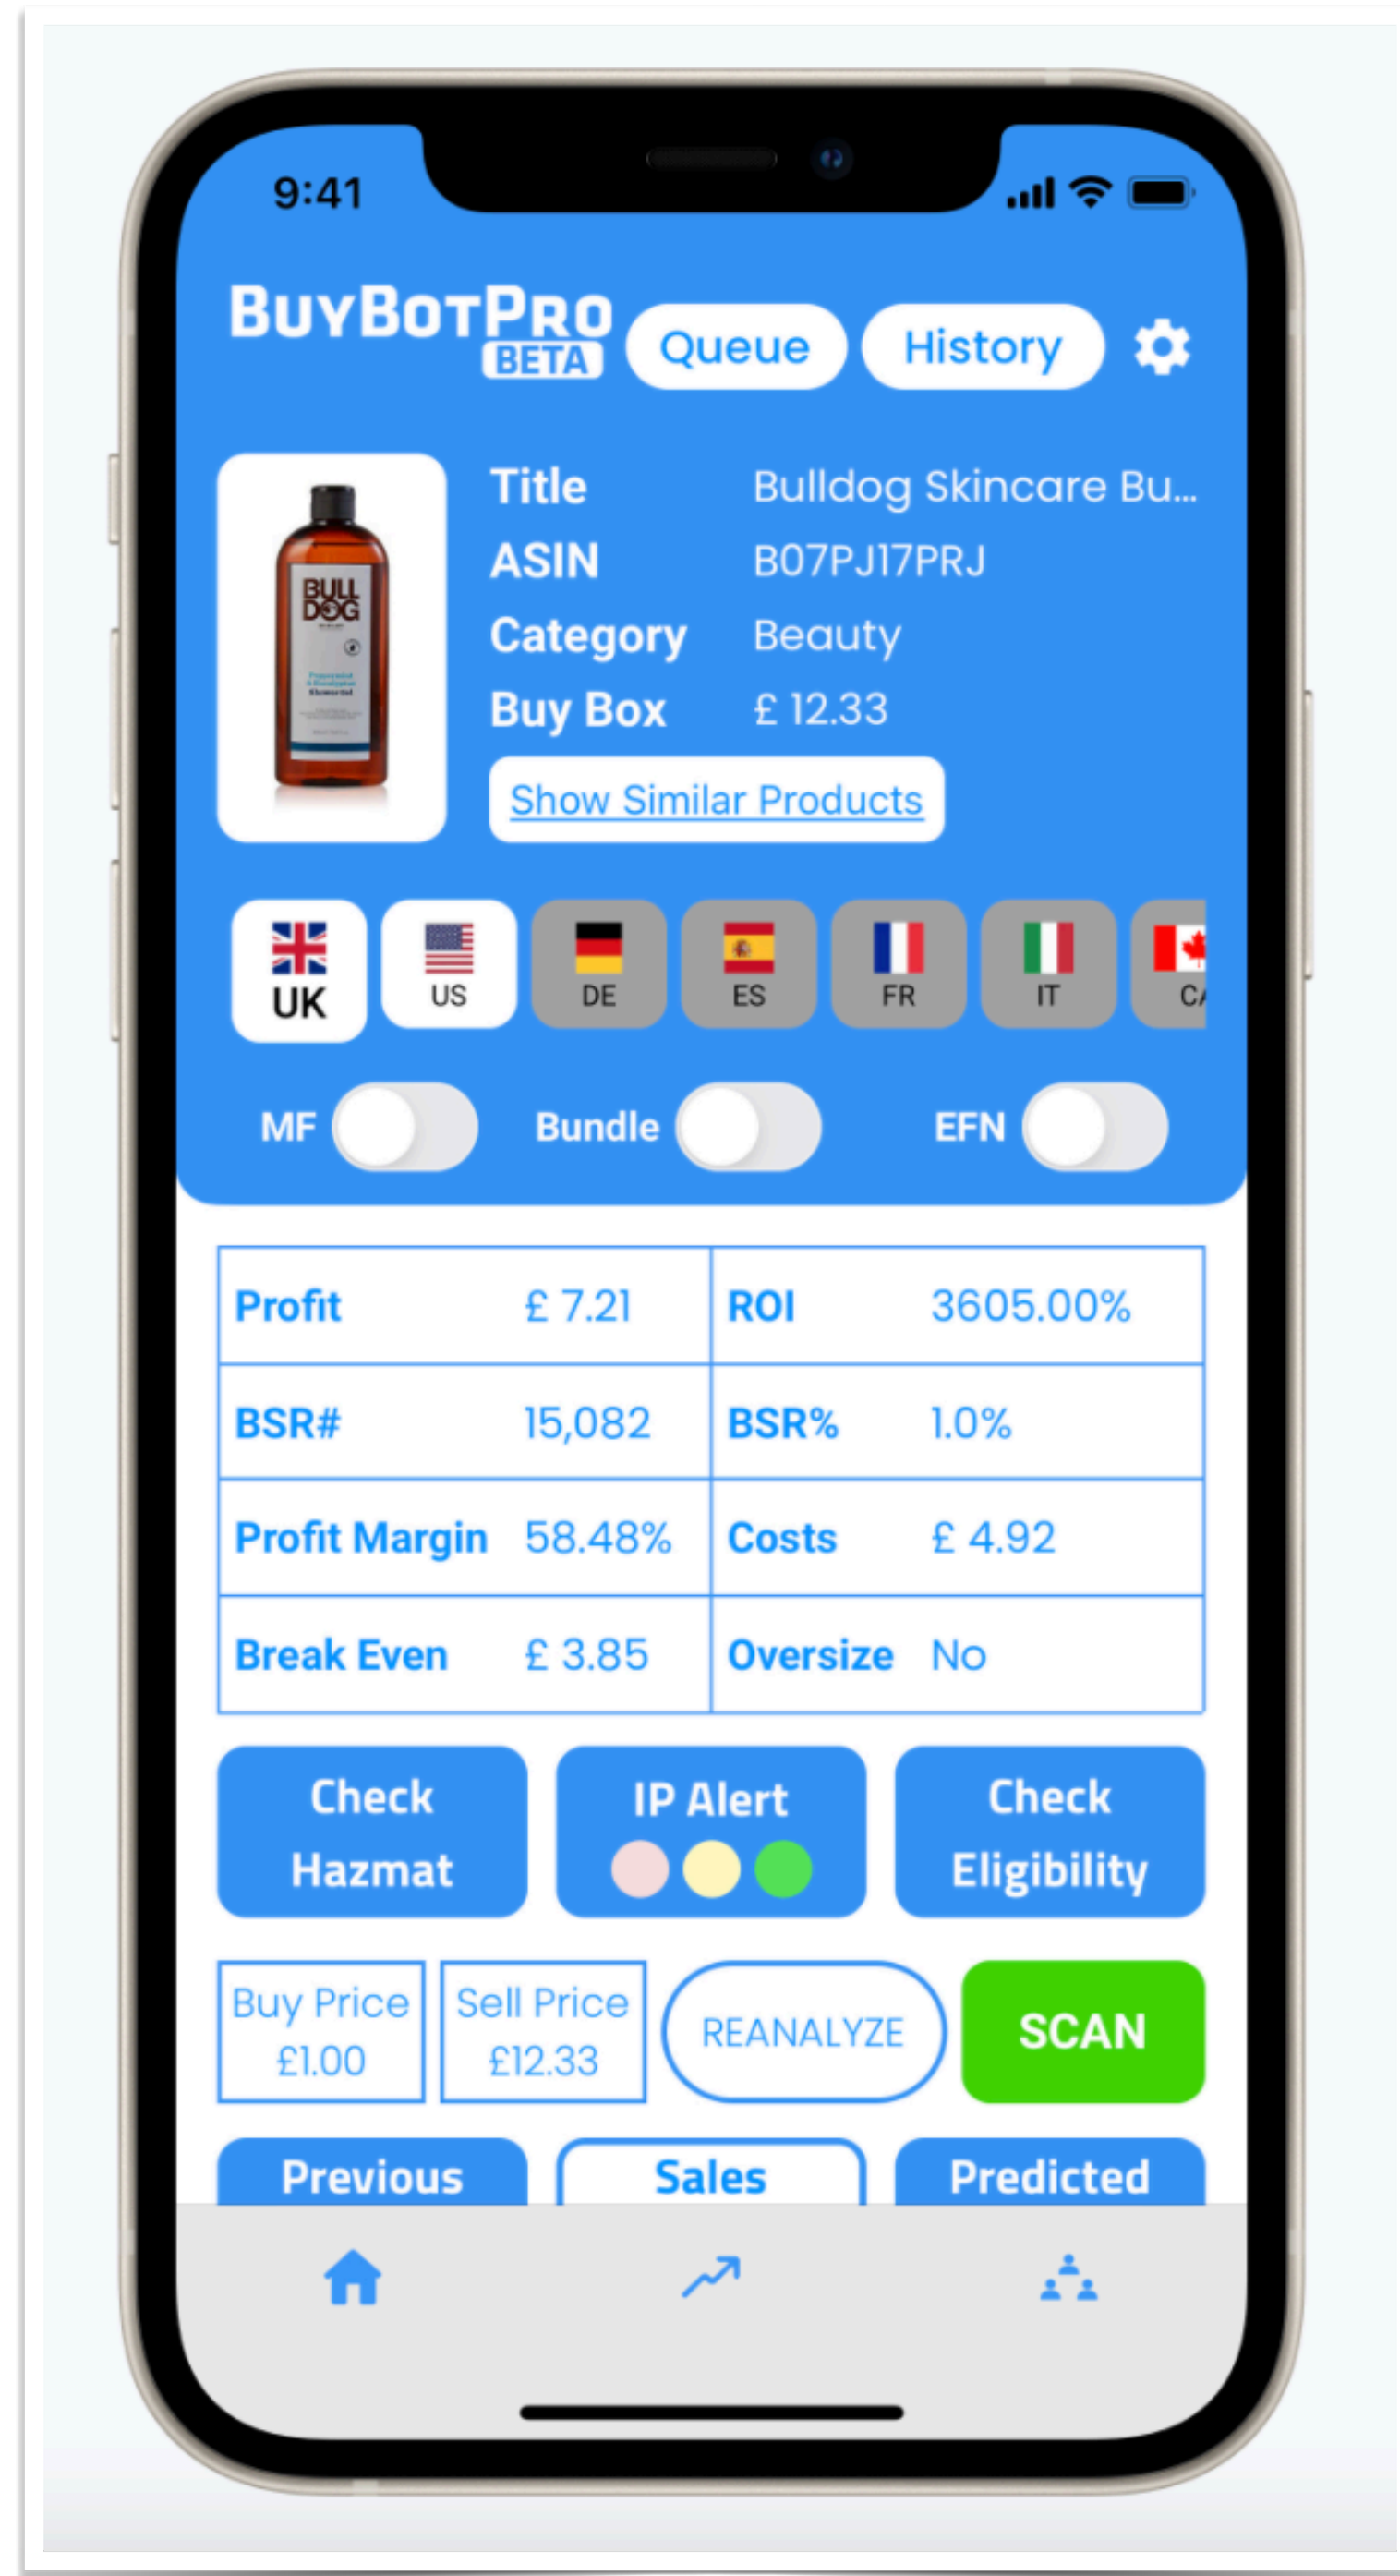

🇺🇸 🇬🇧 [Get Started Now](#)

The World's 1st Fully Automated FBA Calculator & Deal Analysis Tool For Amazon Sellers - BuyBotPro!

Now you can fully automate your Online Arbitrage, Retail Arbitrage and Wholesale deal analysis and buy decisions... with your very own virtual buying assistant - BuyBotPro®!

The laptop screen displays the BuyBotPro interface, which is overlaid on an Amazon product page for a Gund Philbin Bear Large (Chocolate). The interface includes a sidebar with various analytics and settings, such as Buy Price (£), Sell Price (£), and a list of metrics like ASIN, BSR, and Profit Margin. The main content area shows the product details, including the price (£20.99) and a video player. The interface is designed to help Amazon sellers analyze deals and make informed purchasing decisions.

BuyBotPro also now includes a mobile app for FREE, for scanning deals in store in real life, not just online (exactly the same as online arbitrage but we call it retail arbitrage)

Then you take delivery of the
product and send them into
Amazon in one big box.

If you can't wait in for deliveries or don't want to deal with boxes, you can send them to a PREP CENTER first, who will send them to Amazon for you.

Now, Amazon stores the products on their shelves until they sell.

Then they pick, pack and ship the product to their customer, on your behalf.

They take a small fee for doing all the hard
work for you.

BuyBotPro also tells you the fee they will charge and the profit you will make BEFORE you buy the product, so no surprises.

Sounds too good to be true? Well,
there's no catch... But here's the
thing...

You're NOT the only person doing this.
You have competition.

So if 10 people are all selling the same product as you, how does Amazon decide which seller gets the sale?

It uses something called the BUY BOX.

It's Amazon's way of fairly distributing the sales to their sellers and the seller making the best offer - which usually means the CHEAPEST priced seller - even if it's only 1 pence!

The problem with that is, when you are selling your product at £19.99 and another seller decides to sell the product at £19.98 it means Amazon usually gives the CHEAPER seller the buy box, for just 1 pence difference, meaning you don't get the sale!

You cannot be monitoring your prices all day and all night changing a penny here and a penny there to make sure you have the buy box

So, we use a piece of software called a repricer. Repricers watch the price of your stock for you and adjust the price based on rules you give it.

The repricer we recommend you use is Profit Protector Pro. It not only monitors and adjusts prices for you, when it gets the buy box for you, it tries to increase the price without losing it, which means you could sell faster and for more profit.
